17 Determination and hierarchy of fair values

A large majority of Sampo Group's financial assets are valued at fair value. The valuation is based on either published price quatations or valuation techniques based on market observable inputs, where available. For a limited amount of assets the value needs to be determined using other techniques. The financial instruments measured at fair value have been classified into three hierarchy levels in the notes, depending on e.g. if the market for the instrument is active, or if the inputs used in the valuation technique are observable.

On level 1, the measurement of the instrument is based on quoted prices in active markets for identical assets or liabilities.

On level 2, inputs for the measurement of the instrument include also other than quoted prices observable for the asset or liability, either directly or indirectly by using valuation techniques.

Transfers betweel levels 1 and 2

During the last quarter, the Group started to utilise the BVAL Score information for level determination. As a result, there were several classification changes from level 2 to level 1. Debt securities available-for-sale EURm 5,438 (151) were transferred during the financial year. Also debt securities at fair value through p/I EURm 19 were transferred. Equity securities EURm 68 and debt securities EURm 368, related to unit-linked insurance, were equivalently transferred to level one.

Sensitivity analysis of fair values

The sensitivity of financial assets and liabilites to changes in exchange rates is assessed on business area level due to differenct base currencies. In P&C insurance, 10 percentage point depreciation of all other currencies against SEK would result in an increase recognised in profit/loss of EURm 30 (12) and in a decrease recognised directly in equity of EURm 13 (11). In Life insurance, 10 percentage point depreciation of all other currencies against EUR would result in an increase recognised in profit/loss of EURm 35 (14) and in a decrease recognised directly in equity of EURm 94 (68). In Holding, 10 percentage point depreciation of all other currencies against EUR would have no impact in profit/loss, but a decrease recognised in equity of EURm 71 (15).

The sensitivity analysis of the Group's fair values of financial assets and liabilities in differenct market risk scenarios is presented below. The effects represent the instantaneous effects of a one-off change in the underlying market variable on the fair values on 31 Dec. 2014.

The sensitivity analysis includes the effects of derivative positions. All sensitivities are calculated before taxes.

The debt issued by Sampo plc is not included.

	Interest rate		Equity	Other financial investments
	1% parallel shift down	1% parallel shift up	20% fall in prices	20% fall in prices
Effect recognised in profit/loss	-78	50	-0	-4
Effect recognised directly in equity	186	-179	-625	-196
Total effect	108	-130	-625	-200
